***Internship at Xibix Solutions***

- Development of front-end features and reusable components using React;
- Deployment and hosting of application services on Microsoft Azure;
- Design and querying of SQL databases for bid data storage and retrieval;
- Integration of AI-powered features to support and automate bid management tasks;
- Collaboration with the team, testing features and fixing bugs to improve usability and reliability;

**07/2024 - 08/2024**
***Cashier— Continente (Seasonal Work)***

- Direct customer service, ensuring a positive experience;
- Product registration and billing with accuracy;
- Assistance with stock replenishment and store organization;
- Collaboration with the team to achieve daily goals and maintain an efficient working environment.

## SKILLS

**Programming Languages and Scripts:**
- Java, JavaScript, C#, PHP, PL/SQL, HTML, CSS

**Frameworks & Libraries:**
- React, Bootstrap

**Databases:**
- MySQL, Oracle, MongoDB

**Tools and Platforms:**
- Django, RStudio, Cisco Packet Tracer, Power BI

**Advanced Concepts:**
- Machine Learning, Web Development, Object-Oriented Programming

## PROJECTS

***02/2025 - 06/2025***
***BIP- Krawkow Polytechnic, Poland***

Development of an interactive website using the React library for front-end. The project includes:

- Creation of reusable React components (menus, cards, forms, etc.);
- Integration with external API for dynamic data loading;
- Use of React Hooks (useState, useEffect) for state management and side effects;
